

# Macaroni: Crawling and Enriching Metadata from Public Model Zoos

Ziyu Li, Henk Kant, Rihan Hai, Asterios Katsifodimos, and Alessandro Bozzon

## MOTIVATION

26%

model cards do not contain performance results

1%

of models undergo official performance verification

2%

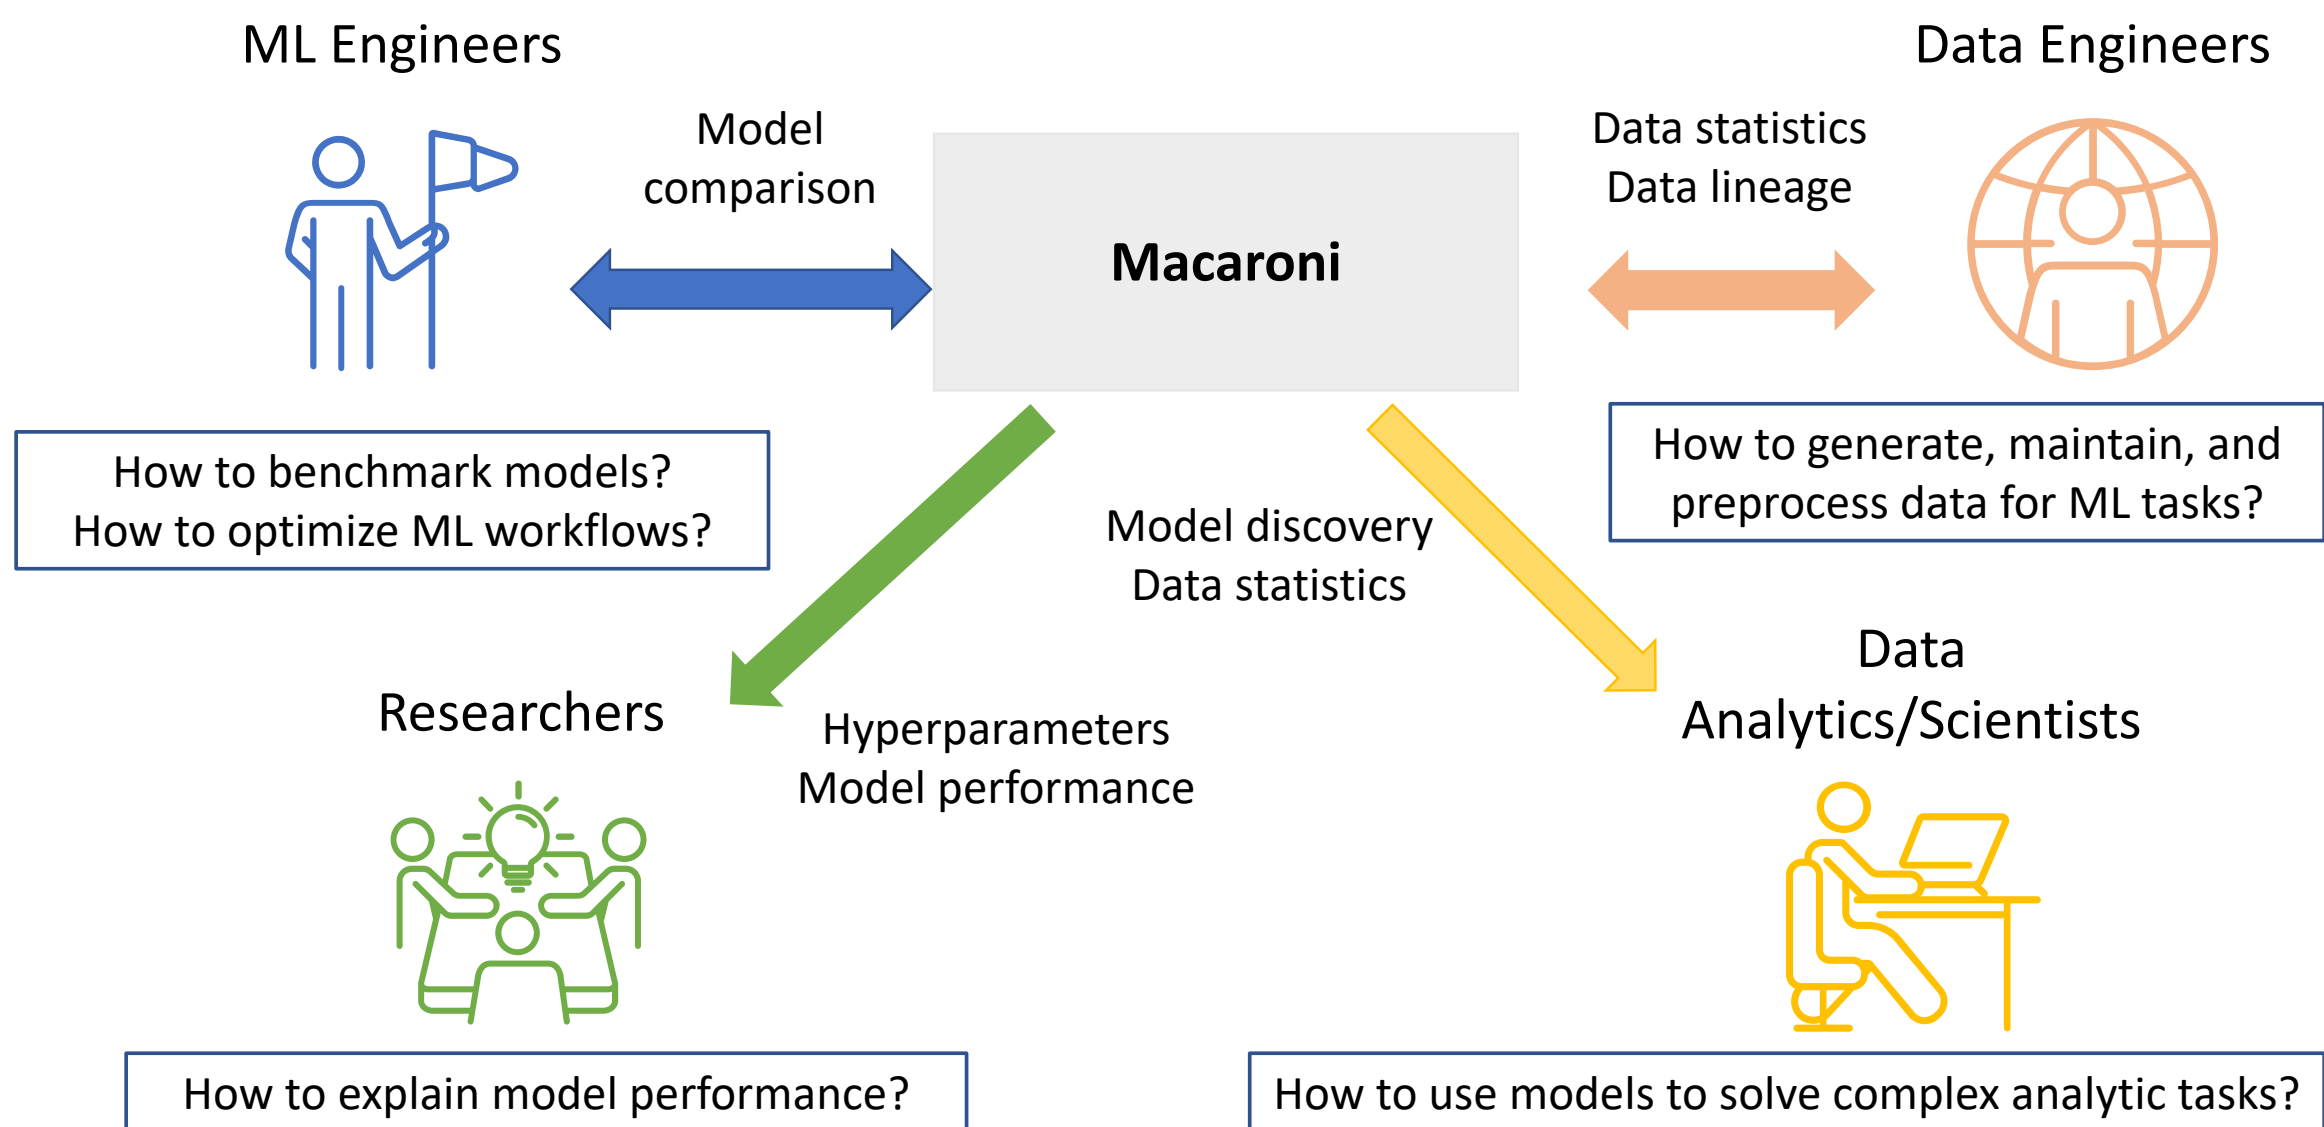

of model cards provide results of more than three metrics

11%

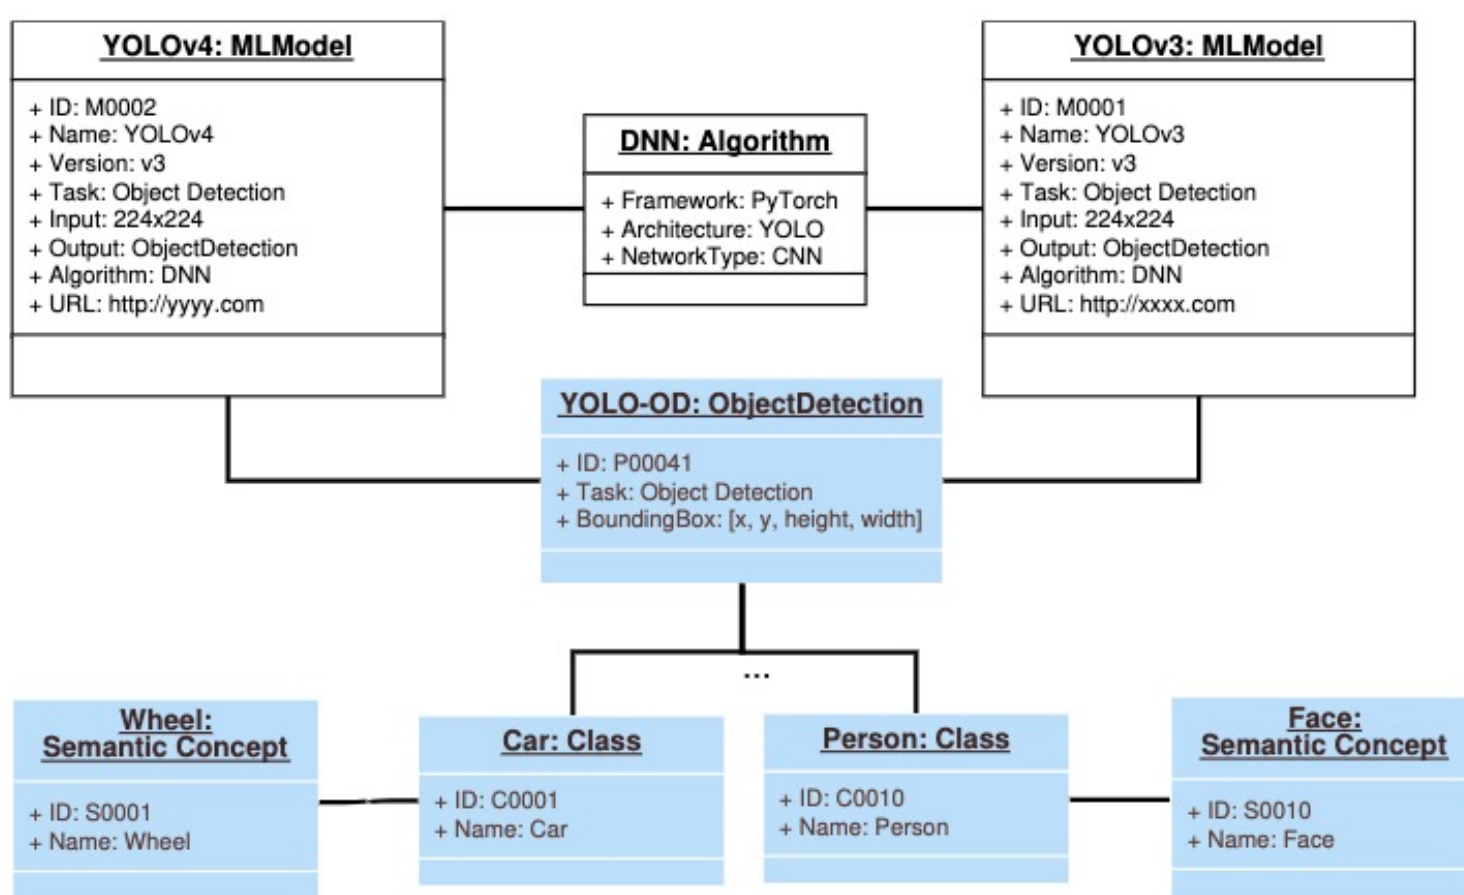

of model performance is presented in textual format

24%

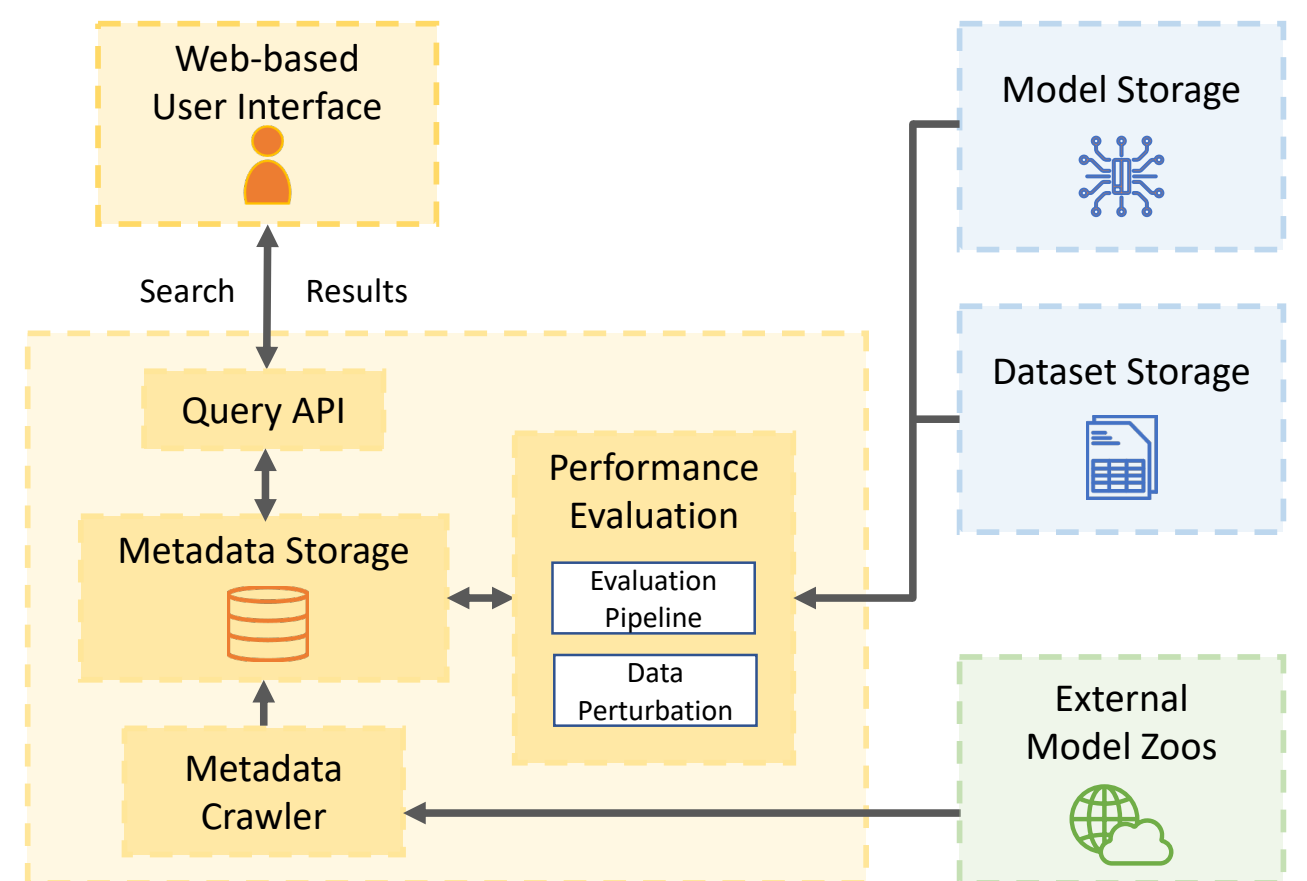

of model cards display only a single type of evaluation metric

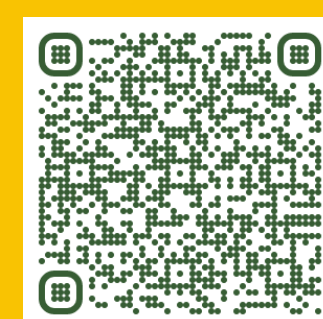

## Metadata Model Extract

## Architecture Overview
